Expertise in Unity Tool Development & Game Mechanics Optimization

Professional Summary

Unity Game Developer with 4+ years in custom tool development and procedural content generation, known for boosting productivity by 80% through optimized workflows. Experienced in delivering scalable, high-quality gaming experiences under tight deadlines and improving player engagement with refined game mechanics.

Technical Skills

Languages: C#, C++, C

Game Development: Unity (Advanced), Unreal Engine (Intermediate), Photon Networking, AR/VR

Tools & Technologies: Visual Studio, Git, Adobe Illustrator, Shader Programming, AI in Games

Specialized Knowledge: Custom Unity Tool Development, Game Performance Optimization, Procedural Content Generation

Professional Experience

DeftSoft **Mohali, Punjab**
Unity Game Developer *Feb 2023 – Oct 2024*

- **Led** the development of an infinite runner game in Unity, enhancing player engagement by **30%** with optimized gameplay mechanics
- **Engineered** realistic game environments using Unreal Engine, achieving a **25%** improvement in visual quality
- **Designed** intuitive UI/UX interfaces, leading to a **20%** increase in user satisfaction
- **Executed** procedural generation techniques, reducing level design time by **40%**
- **Conducted** testing and refinements based on player feedback, improving game ratings by **1.5 stars**

CodeSculpt Labs **Remote/India**
Unity Developer *June 2020 – Present*

- **Delivered** 20+ Unity projects for diverse clients, achieving high-quality prototypes and full games ahead of schedule
- **Published** Unity tools on the Unity Asset Store, aiding developers in reducing development time by **50%**
- **Architected** a horror game with adaptive AI behaviors and immersive physics, showcasing advanced Unity AI systems
- **Optimized** gameplay for smoother experiences across devices, achieving consistent high frame rates
- **Collaborated** with international clients to deliver customized, scalable solutions for varied project requirements

Key Projects

Twisco Run, Finger Royale, Recurve28: Directed the development of these titles, each surpassing

10k+ Downloads, with engaging gameplay and intuitive controls, resulting in a **40%** increase in user retention.

Enhanced UIManager Module: Overhauled and expanded the UIManager tool, streamlining UI workflows and slashing development time by **80%**.

Auth & Notification Modules: Designed and integrated robust modules for a streamlined user experience, cutting development timelines by **70%**.

Personal Projects

Unity Development Tools:

- **UIManager Tool**: Created an advanced utility for managing UI elements across projects, increasing UI development efficiency by **25%**
- **Event System**: Leveraged ScriptableObjects for decoupled event management, reducing dependencies by **40%**
- **Material Generator**: Built a tool for programmatically creating materials with custom shaders, reducing setup time by **30%**
- **Automated Scene Setup Scripts**: Introduced scripts for project configuration, reducing manual setup time by **50%**
- **Project Setup Tool Integration**: Combined tools into a unified utility automating project initialization, cutting setup time by **60%**

Horror Game (Unity): Created an AI-driven horror experience, employing adaptive enemy behaviors and realistic physics for enhanced immersion.

Education

Lovely Professional University — **Punjab**
Bachelor of Computer Application — *Sep 2020 – Jun 2023*
CGPA: **8.21**

Certifications

- **Unity Certified Programmer**
- **Game Design and Development with Unity 2020 Specialization**
