Expertise in Unity Tool Development & Game Mechanics Optimization

Professional Summary

Unity Game Developer with 4+ years in custom tool development and procedural content generation, known for boosting productivity by 80% through optimized workflows. Experienced in delivering scalable, high-quality gaming experiences under tight deadlines and improving player engagement with refined game mechanics.

Technical Skills

Languages: C#, C++, C

Game Development: Unity (Advanced), Unreal Engine (Intermediate), Photon Networking, AR/VR

Tools & Technologies: Visual Studio, Git, Adobe Illustrator, Shader Programming, AI in Games

Specialized Knowledge: Custom Unity Tool Development, Game Performance Optimization, Procedural Content Generation

Professional Experience

DeftSoft **Mohali, Punjab**
Unity Game Developer *Feb 2023 – Oct 2024*

- **Led** the development of an infinite runner game in Unity, elevating player engagement by **30%** with refined gameplay mechanics
- **Constructed** realistic game environments using Unreal Engine, achieving a **25%** enhancement in visual quality
- **Crafted** intuitive UI/UX interfaces, leading to a **20%** boost in user satisfaction
- **Applied** procedural generation techniques, minimizing level design time by **40%**
- **Refined** gameplay through testing and player feedback, enhancing game ratings by **1.5 stars**

CodeSculpt Labs **Remote/India**
Unity Developer *June 2020 – Present*

- **Delivered** 20+ Unity projects for diverse clients, producing high-quality prototypes and full games ahead of schedule
- **Released** Unity tools on the Unity Asset Store, aiding developers in accelerating development by **50%**
- **Engineered** a horror game with adaptive AI behaviors and immersive physics, showcasing advanced Unity AI systems
- **Optimized** gameplay for smooth experiences across devices, achieving consistent high frame rates
- **Collaborated** with international clients to deliver customized, scalable solutions for varied project requirements

Published Games

Alnahsha Run:

- **Achieved 1M+ Downloads** and upheld a **4.6-star rating** on Google Play Store through consistent optimization and timely updates.
- **Curated** culturally themed levels and environments (Riyadh, Cairo, Dubai) that resonated with players, significantly raising player engagement.

- **Integrated** daily challenges, missions, and leaderboards, driving up player retention rates by **40%**.
- **Enhanced** user experience by conducting rigorous testing and resolving bugs, reducing churn rates.

Twisco Run:
- **Secured** over **10K+ Downloads** and strengthened engagement through challenging gameplay and iconic characters.
- **Designed** the storyline and mission objectives, guiding players as Twisco escapes the antagonist Dr. Pickles, creating a narrative-driven experience.
- **Introduced** engaging coin-collecting mechanics and progression levels, fostering increased player retention.
- **Ensured** adherence to data safety compliance and the Play Families Policy, boosting credibility and accessibility across user demographics.

Key Projects

Finger Royale, Recurve28: **Spearheaded** development for titles that each achieved **10k+ Downloads**, with engaging gameplay and intuitive controls, resulting in a **40%** improvement in user retention.

Enhanced UIManager Module: **Revamped** and expanded the UIManager tool, streamlining UI workflows and reducing development time by **80%**.

Auth & Notification Modules: **Built** and integrated robust modules for a seamless user experience, cutting development timelines by **70%**.

Personal Projects

Unity Development Tools:
- **Devised** a **UIManager Tool**: An advanced utility for managing UI elements across projects, improving UI development efficiency by **25%**
- **Introduced** an **Event System**: Leveraged ScriptableObjects for decoupled event management, reducing dependencies by **40%**
- **Constructed** a **Material Generator**: A tool for programmatically creating materials with custom shaders, saving setup time by **30%**
- **Automated** Scene Setup Scripts: For project configuration, minimizing manual setup time by **50%**
- **Unified** Project Setup Tool Integration: Combined tools into a single utility for project initialization, cutting setup time by **60%**

Horror Game (Unity): **Orchestrated** an AI-driven horror experience, applying adaptive enemy behaviors and realistic physics for intensified immersion.

Education

Lovely Professional University — **Punjab**
Bachelor of Computer Application — *Sep 2020 – Jun 2023*
CGPA: **8.21**

Certifications

- **Unity Certified Programmer**
- **Game Design and Development with Unity 2020 Specialization**
